

finebeam ^{Q+plus}

1064nm & 532nm Q-Switched Nd:YAG Laser

More Advanced
Nd:YAG Laser

Quality Pulse Technology

Higher Peak Power
More Uniform Beam
Longer Lasting System

For Your Shiny Life

1064nm & 532nm Q-Switched Nd:YAG Laser System

Finebeam Qplus is a more advanced q-switched Nd:YAG laser system based on quality pulse technology. It makes 2 wavelengths such as 1064nm and 532nm with zoom, collimator, and fractional handpieces. This is the best solution for both skin rejuvenation and pigment treatments.

1 Higher Peak Power

Dual Chamber of Laser Head in the Resonator for High Peak Power as 300MW with Short Pulse Duration

2 More Uniform Beam

Flat Top-Hat Beam Profile for More Precise Beam Pattern with Max. 10mm Beam Size

3 Longer Lasting System

Articulated Arm with 7 Coated Reflectors based on Advanced Power Technology for Quality Pulse of High Energy up to 1.2J

Treatment Effects

- Melasma & PIH Improvement
- Nevus of Ota & ABNOM Removal
- Skin Whitening & Brightening
- Soft Peeling
- Tattoo Removal
- Freckle, Lentigines, Café-au-lait Spot, Becker's-Nevus & Age Spot Improvement
- Skin Rejuvenation
- Various Pigment Lesions

Technical Specifications

- Wavelength: 1064nm / 532nm
- System: Nd:YAG Laser
- Mode: QSW (Q-Switched)
- Pulse Duration: QSW <10ns
- Pulse Energy: QSW 1064nm Single Max. 1.2J
QSW PDP Max. 2.0J
QSW Non-Q Max. 3.0J
QSW 532nm Single Max. 0.5J
- Frequency: 1~10 Hz
- Spot Size: Zoom 1064nm 2~10mm / 532nm 1~7mm
Collimator 1064nm 8 mm (Optional)
Fractional 1064nm 5x5mm² (Optional)
- Cooling System: Water to Air Heat Exchanger
- Electrical: 100~240V, 50/60Hz
- Dimension: 320(W) x 850(L) x 800(H) mm
- Weight: 70kg (Max. Weight: 80kg)

All in One

finebeam Dual

Q-Switched & Long-Pulse Nd:YAG Laser

Dual Nd:YAG Laser

Quality Pulse Technology

Higher Peak Power

More Uniform Beam

Longer Lasting System

For Your Shiny Life

Nd:YAG Laser System for All the Functions

Finebeam Dual is a more advanced Nd:YAG laser system based on quality pulse technology. There are 2 different functional modes such as q-switched and long-pulse with each handpiece. This is the best solution for both skin rejuvenation and body treatments.

1 Higher Peak Power

Dual Chamber of Laser Head in the Resonator for High Peak Power as 300MW with Short Pulse Duration

2 More Uniform Beam

Flat Top-Hat Beam Profile for More Precise Beam Pattern with Max. 10mm Beam Size

3 Longer Lasting System

Articulated Arm with 7 Coated Reflectors based on Advanced Power Technology for Long Pulse of High Energy up to 60J

Treatment Effects

- Melasma & PIH Improvement
- Nevus of Ota & ABNOM Removal
- Soft Peeling
- Tattoo Removal
- Freckle, Lentigines, Café-au-lait Spot, Becker's-Nevus, Age spot Improvement
- Genesis
- Skin Tightening & Lifting
- Acne Erythema Improvement
- Telangiectasia
- Hair Removal

Technical Specifications

- Wavelength: 1064nm / 532nm
- System: Dual Nd:YAG Laser
- Mode: QSW (Q-Switched) / LPS (Long-Pulse)
- Pulse Duration: QSW <10ns / LPS 0.5~300ms
- Pulse Energy: QSW 1064nm Single Max. 1.6J
QSW PDP Max. 2.2J
QSW Non-Q Max. 3.5J
QSW 532nm Single Max. 0.5J
LPS Max. 60J
- Frequency: 1~10 Hz
- Spot Size: Zoom 1064nm 2~10mm / 532nm 1~7mm
Collimator 1064nm 8 mm (Optional)
Fractional 1064nm 5x5mm² (Optional)
- Cooling System: Water to Air Heat Exchanger
- Electrical: 100~240V, 50/60Hz
- Dimension: 320(W) x 850(L) x 800(H) mm
- Weight: 75kg (Max. Weight: 85kg)
