

SPARTAN

It is the new equipment for permanent hair destruction. Spartan is a State-of-the-art device thanks to its technology it allows to control the current which supplies the diode in order to accurately be transformed in laser photons.

COMPETITIVE ADVANTADGES

15.000.000 GUARANTEED SHOTS + WORKING WITH CAPACITORS + MOTION MODE

DIRECTIONS FOR USE

- ✓ Hair removal

Features	
Laser type	Diode Laser
Wavelength	804-812nm
Maximum Power	1.200W
Spot size	10x10mm
Pulse duration	10 -100ms
Operating frequency	Standard mode 1-3 Hz Motion mode 10 Hz
Cooling system	Water
Cooling Temperature	4o a -8oC
Maximum consumption	1.000 W
Supply voltage	90-250v

Features	
Laser type	Diode Laser
Wavelength	804-812nm
Maximum Power	3.000W
Spot size	20x10mm
Pulse duration	10 -100ms
Operating frequency	Standard mode 1-3 Hz Motion mode 10 Hz
Cooling system	Water
Cooling Temperature	4o a -8oC
Maximum consumption	1.000 W
Supply voltage	90-250v
