Safe, gentle and effective body contouring solution

*“BodyFX is the first, and only, technology which not only uses advanced, focused radio-frequency energy to target fat specifically, but also tightens the collagen and dermis. The result is not just a reduction in fat, but also a remodeling and tightening of the skin - which is everyone’s dream goal for body sculpting.”*

- ANDREW NELSON

*“BodyFX is really unique and stands alone as an excellent way to treat stubborn body fat areas with little to no pain or side effects.”*

- MARIUSZ SAPIJASZKO

# BODY fx

Discover a superior solution to improve the appearance of cellulite, reduce dimpled skin, loss of elasticity on the abdomen, love handles, hips, thighs AND other areas that require fat reduction.

## WHAT IS BODYFX?

BodyFX is a new, long lasting, non-invasive solution to reduce the unsightly appearance of cellulite. BodyFX will reshape your body to provide a non-surgical alternative to liposuction.

BodyFX is a perfect solution to get rid of your mummy tummy or muffin top, and improve your general body contour.

## HOW DOES BODYFX WORK?

BodyFX uses a combination of different clinically proven modalities including radio-frequency energy, deep tissue heating and suction coupled negative pressure.

The radio-frequency energy distributes heat to the skin and underlying fat, causing the tissues to heat and contract. The vacuum and controlled energy pulses then work synergistically to provide beautiful body shaping results.

## BODY SHAPING AND CELLULITE TREATMENT

*“I lost inches in my thighs and my body looks and feels tighter. I would recommend this treatment to anyone who wants to get rid of that little extra fat they are carrying.”*

- SUSAN, PATIENT

## HOW SAFE IS THE TREATMENT?

A series of RF energy is delivered by a succession of pulses at 1 million cycles per second. While this may sound intense, it is very safe. To maximize comfort, the body's temperature will be constantly monitored, with ongoing accurate feedback of the skin's temperature. This thermal monitoring provides the utmost in temperature control.

## DOES IT HURT?

Most users find BodyFX comfortable. During treatment you can expect a warming of your skin and gentle pulling sensation as the radio-frequency and vacuum work to smooth out unwanted stubborn pockets of fat.

## HOW MANY SESSIONS ARE REQUIRED?

It is recommended that weekly sessions are performed over an eight week period. Gradual improvements in the treatment area can be seen following the first few treatments – with the skin's surface feeling smoother and softer immediately.

## WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is absolutely no downtime for BodyFX. It can be a lunch time procedure. Patients will notice redness and warmth in the treated area which will subside after a few hours. This warmth is equivalent to the sensation felt after a deep tissue massage and will not prevent anyone from their regular activities.

Please speak to your aesthetic provider to see if you are a candidate for BodyFX.
