PLUS

A safe and comfortable non-surgical solution to refine and reverse skin laxity.

tone & refine your body

"I had some annoying and ugly sagging skin just above my knees. I work out a lot and just had no other way to get the skin back to where I needed it to go, the Plus got me back in summer shorts again."

- KAYLA, PATIENT

WHAT IS PLUS?

Plus uses fractionated radio-frequency energy to stimulate collagen production for body remodeling. After Plus treatments you can achieve a more youthful and toned skin contour making your body appear smoother, sexier and younger.

IS PLUS FOR ME?

Plus is recommended for individuals who are looking for a non-invasive skin treatment to address targeted areas that require contraction. Plus can be used to reduce texture irregularities in lax skin to provide a lifted appearance. Plus is safe and can be used on all skin types and tones.

WHAT RESULTS WILL I SEE AND FEEL?

During treatment most patients will feel a heat sensation and "feel" tighter. Over time patients typically notice a reduction in the folds of their skin leading to a smoother contour of the body. Textural irregularities will even out and sagging skin will appear more toned.

HOW DOES PLUS WORK?

Plus was created and based on the development and clinical success of the proprietary A.C.E. (Acquire, Control and Extend) technology. A.C.E. technology targets deep within the skin to ensure that no areas are under, or over-treated, thereby maximizing results and providing consistent outcomes.

PLUS USES PROPRIETARY A.C.E. (ACQUIRE, CONTROL, EXTEND) TECHNOLOGY WHICH PROVIDES SAFE, COMFORTABLE AND EFFECTIVE TREATMENTS AT OPTIMAL ENERGY SETTINGS TO MAXIMIZE AESTHETIC OUTCOMES.

WHAT AREAS CAN BE TREATED?

Plus can be used on parts of the body that may need contraction after the effects of weight gain/loss or general aging. Most common areas of treatment include the abdomen, arms (bat wings), inner thighs, outer thighs, back fat and knees.

WILL IT HURT?

Plus is essentially painless and has no downtime; it feels like a hot stone massage. Patients may see slight redness in the treated area, which will lessen within a few hours. All patients are able to return to their daily activities immediately after treatment.

HOW MANY SESSIONS ARE REQUIRED?

Typically, weekly sessions are recommended over a six to eight week period. Individuals with mild laxity may be treated in fewer sessions with more weeks between each treatment. Scheduling should be based on a pre-evaluation. Best results will be noticed over time or a series of treatments.

Please speak to your aesthetic provider to see if you are a candidate.
